SIDHARTHA KUMAR MALLA

Data Analyst | SQL | Excel | Python | Power BI

Bengaluru, Karnataka | +91-7008206863 | sidharthakumarmalla@gmail.com | linkedin.com/in/sidhartha-kumar-malla | sidharthakumar-portfolio.vercel.app

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience turning transactional data into actionable business insights using SQL, Python, Power BI, and Excel. Delivered end-to-end analytics work spanning 260K+ records and $3B+ in analyzed revenue across retail, financial, and healthcare use cases — from data cleaning, validation, and root-cause analysis to executive-ready dashboards. DP-600 certified Fabric Analytics Engineer.

TECHNICAL SKILLS

SQL: SQL, PostgreSQL, T-SQL, joins, CTEs, window functions
Excel: Pivot Tables, VLOOKUP/XLOOKUP, SUMIFS/COUNTIFS, formulas, reporting
Analytics: Data Cleaning, EDA, KPI Reporting, Data Validation, Data Auditing, Cohort Analysis, Business Insights
Python: Pandas, NumPy, SciPy, Matplotlib, Seaborn, Jupyter Notebook
BI & ETL: Power BI, DAX, Power Query, Tableau, Grafana, Microsoft Fabric, ETL
Data Modeling: Star Schema, Semantic Models, Data Warehouse, Lakehouse
Statistics: A/B Testing, Hypothesis Testing, Significance Testing
Tools: Git, GitHub, JSON

PROFESSIONAL EXPERIENCE

Data Analyst Intern | SleekSky *Sep 2026 – Oct 2026*

- Analyzed healthcare cohort data in PostgreSQL to detect data inconsistencies, patient-communication gaps, kit-delivery failures, and operational anomalies across screening programs.
- Built and optimized Grafana dashboards and SQL queries to monitor patient communications, notifications, kit processing, and cohort-level performance.
- Performed root-cause analysis by tracing relationships across database tables and reconciling expected, sent, delivered, and communication metrics.
- Validated table relationships, joins, and data quality on anonymized datasets, documenting reporting limitations and evidence-backed findings to drive team decisions.

Data Analytics Intern | Talentele *Dec 2025 – Jun 2026*

- Automated and standardized weekly reporting workflows, cutting report preparation time from 2+ hours to under 5 minutes.
- Engineered an end-to-end retail analytics solution in Microsoft Fabric, integrating 60K+ transaction records worth $29M+ in revenue from multiple CSV sources into a centralized reporting platform.
- Architected a Bronze–Silver–Gold data pipeline and used SQL to clean, transform, and validate data before generating analytical datasets.
- Developed Power BI semantic models with DAX measures and interactive dashboards to analyze sales, profit, customer, and regional performance.

PROJECTS

Superstore Sales Analysis | Excel | Python | Pandas | NumPy

- Cleaned and prepared Superstore transactional data in Python — converting dates, handling missing values and duplicates, and engineering year/month features.
- Conducted exploratory analysis to surface top-performing categories, regions, segments, loss-making products, and seasonal sales patterns.
- Built category/region/segment comparisons, monthly trends, and correlation visuals, translating sales, profit, and order findings into business recommendations.

Financial Sales & Profitability Dashboard | Power BI | DAX | Power Query

- Gathered stakeholder reporting requirements and designed an executive dashboard analyzing $3.30B+ in net sales and $465M+ in gross profit.
- Identified a 6% YoY margin decline in a key product category through root-cause analysis and surfaced an actionable business insight.
- Built and documented 15+ DAX measures for YTD, QTD, MTD, and growth analysis, replacing manual Excel reporting and cutting recurring effort by 2+ hours per cycle.

Retail Strategy & Customer Analytics | Excel | Python | Statistics

- Analyzed 264K+ retail transaction records, removing outliers and engineering features to uncover customer segments, seasonal trends, and promotional opportunities.
- Evaluated a retail-store trial by selecting statistically comparable control stores and running uplift and significance testing to assess performance.

EDUCATION

M.Tech, Industrial Engineering & Management | Odisha University of Technology and Research (OUTR) | CGPA: 8.71/10 | 2023 – 2025
B.Tech, Electrical Engineering | Parala Maharaja Engineering College (PMEC) | CGPA: 8.04/10 | 2019 – 2023

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
- IBM Data Analyst Professional Certificate
- Generative AI Fundamentals (IBM)
- SQL Intermediate Certificate (HackerRank)
- McKinsey Forward Program
