

SIDHARTHA KUMAR MALLA

Data Analyst | SQL | Python | Power BI | Microsoft Fabric
Bhubaneswar, Odisha | +91-7008206863 | sidharthakumarmalla@gmail.com
GitHub | LinkedIn

Professional Summary

Data Analyst with hands-on experience building end-to-end analytics solutions using SQL, Python, Power BI, and Microsoft Fabric. Experienced in ETL development, data modeling, KPI reporting, and dashboard automation, supporting analysis of 60,000+ retail transactions across six countries.

Technical Skills

Analytics & BI: Power BI, DAX, Power Query, KPI Reporting, Dashboard Development, Data Visualization

Programming: SQL, PostgreSQL, T-SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), CTEs, Window Functions

Data Engineering: Microsoft Fabric, Lakehouse, Data Warehouse, ETL Pipelines, Star Schema, Semantic Models

Tools: Excel, Git, GitHub, IBM Cognos, Streamlit

Professional Experience

Data Analytics Intern | Talentele

Jan 2025 – Present

- Built an end-to-end analytics platform using Microsoft Fabric, integrating and transforming **60,000+ retail transaction records** across six countries into a centralized reporting environment.
- Developed **20+ SQL transformation queries** and a Bronze-Silver-Gold architecture using Lakehouse, Warehouse, and Data Pipelines to automate data preparation and improve reporting consistency.
- Built Power BI semantic models and **15+ DAX measures**, improving dashboard performance by **35%** and enabling real-time KPI monitoring.
- Automated weekly reporting workflows, reducing report preparation time from **2+ hours to under 5 minutes** through dashboard-driven reporting.

Projects

End-to-End Retail Sales Intelligence Platform

SQL | Microsoft Fabric | Power BI | DAX

- Developed a complete analytics solution for retail operations across six countries, building ETL pipelines, Star Schema models, and executive dashboards tracking **\$29M+ revenue**.
- Implemented drill-through analysis, KPI tracking, and dynamic filtering, enabling business users to analyze customer, product, and regional performance.

Superstore Sales Profitability Analysis

Python | Pandas | Excel

- Analyzed **9,994 sales transactions** and identified a potential **\$286K profit improvement opportunity** by evaluating the impact of discounting on margins.
- Built Python-based scenario models that projected a **12% increase in profitability** through optimized discount threshold recommendations.

Financial Sales & Profitability Dashboard

Power BI | DAX | Power Query

- Developed an executive dashboard analyzing **\$3.30B+ net sales** and **\$465M+ gross profit**, uncovering a **6% YoY margin decline** in a key product category.
- Created **15+ DAX measures** for YTD, QTD, MTD, and growth analysis, replacing manual Excel reporting and reducing recurring reporting effort by **2+ hours per cycle**.

Education

M.Tech, Industrial Engineering & Management

2023 – 2025

Odisha University of Technology and Research (OUTR)

CGPA: 8.71/10

B.Tech, Electrical Engineering

2019 – 2023

Parala Maharaja Engineering College (PMEC)

CGPA: 8.04/10

Certifications

- IBM Data Analyst Professional Certificate
- SQL Intermediate (HackerRank)
- Generative AI Fundamentals (IBM)
- McKinsey Forward Program
